

At Thrive, we want to be different. We want to be undeniably transparent in everything we do.

100% OF YOUR DONATION BRINGS NUTRITION AND HEALTH TO THOSE IN NEED.

Here's how Thrive allocates its revenues during the fiscal year

Early in Thrive's foundation, Natural Calm Canada committed to donating 100% of its profits to fund our administration, operating and fundraising costs.

This allows 100% of your donation to provide the knowledge, seeds, tools and supplies to empower communities and families to grow their own food.

73% Building Sustainable Communities

This covers the costs of our trainers, seeds, supplies and tools needed for a community to start their own Life Garden.

01

16% Admin & Operating Costs

Required to deliver training that empowers families and communities to grow an abundance of healthy, disease-fighting foods.

02

11% Marketing & Fundraising

Used to continually promote the transformative message and initiatives of Thrive and our Life Gardens model.

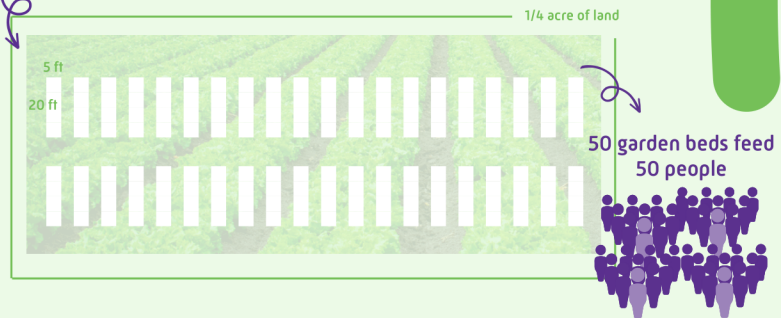

03

Every \$15 donated provides the training, seeds and simple tools needed for 1 person to grow organic, nutritious food for a lifetime.

A Thrive community Life Garden, on average, uses ¼ acre of land. The garden is made up of about 50 garden beds that are 5ft wide by 20ft long. Each Life Garden project produces enough nutritious food to feed approximately 50 people.

LET'S BREAK THAT DOWN.

To build a sustainable garden project...

With a \$15 donation, 1 person is empowered for life...

Nutrition: To collect the greens, coloured vegetables, and alliums to include in their meals.

Health: To harvest the medicinal plants to help fight off life-threatening diseases.

Sustainability: To grow and sell surplus to help cover the costs of needed tools and seeds, making the project sustainable.

Cost efficiency: To practice seed saving techniques, in order to reduce costs and grow healthier and stronger plants each year.
